EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Paul on 9/19/2011.

Please amend claim 4.

4. (Currently Amended) A system for programmatic role-based security in a dynamically generated user interface, the system comprising:

a processor;

an application framework configured through a deployment descriptor comprising a listing of a set of views, a listing of associated program logic and a listing of a set of authorized roles for selected ones of said views;

a first view listed in said deployment descriptor and comprising a linkage to a second view listed in said deployment descriptor; and,

access checking logic disposed in said first view and programmed to omit said linkage where a role of an end user accessing said first view is not

authorized to access said second view according to said listing of said set of authorized roles in said deployment descriptor.

Allowable Subject Matter

2. Claims 4-10, 12-15, and 17 are allowed.

Reason for Allowance

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 4, 8, and 12, Schaeck teaches as follows:

A system for programmatic role-based security in a dynamically generated user interface (methods, systems, and computer program products are disclosed for providing role-specific views from a business web portal which supports one or more aggregated web services. Users having particular roles can be programmatically presented with different views into an aggregated service, see, e.g., Abstract), the system comprising:

an application framework configured through a deployment descriptor comprising a listing of a set of views (multiple role-specific views will be based on the services and/or information which are relevant to a particular role, see, e.g., paragraph [0043]) and a listing of associated program logic (the fine-grained services may include any form of programming logic, including script programs, Java.TM. classes, COM classes, EJBs ("Enterprise JavaBeans".TM.), stored procedures, IMS or other database transactions, legacy applications, and so forth, see, e.g., paragraph [0052]); and

a first view (interpreted as role-specific portal page) listed in said deployment descriptor and comprising a linkage to a second view (interpreted as composite service provided through the portal page) listed in said deployment descriptor (a portal page which provides an entry point into the composite service is then presented to the user, see, e.g., paragraph [0084]).

Schaeck does not teach as follows:

Access checking logic disposed in said first view and programmed to omit said linkage where a role of an end user accessing said first view is not authorized to access said second view according to said listing of said set of authorized roles in said deployment descriptor (see, e.g., applicant's specification paragraph [0025]).

No prior art reference was found that discloses this feature. For these reasons, in conjunction with the other limitations of the independent claims 4, 8, and 12, put this case in condition for allowance. Claims 5-7 and 17, 9 and 10, and 13-15 depend on claims 4, 8, and 12 respectively, and are therefore also allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeong S. Park whose telephone number is (571)270-

1597. The examiner can normally be reached on Monday through Friday 9:00 - 5:30 EST.
